

URGENT FIELD SAFETY NOTICE

Subject: 656504: HLS/ HIT Set - potentially compromised sterile barrier

Affected Product:

REF no.	Article no.	Product description
BE-HLS 7050	701069073	HLS Set Advanced 7.0 with BIOLINE Coating, for the NONUS market
BE-HLS 5050	701069076	HLS Set Advanced 5.0 with BIOLINE Coating, for the NONUS market
BO-HLS 7050	701069083	HLS Set Advanced 7.0 with SOFLINE Coating, for the CA market

Affected Batch No.: See Annex I List of affected batches included below

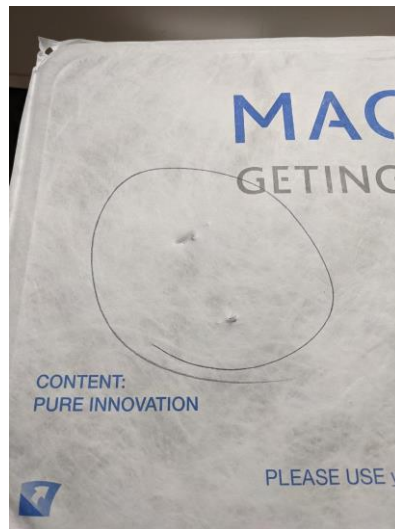

Unique Device Identifier:

REF no.	Article no.	UDI
BE-HLS 7050	701069073	04058863005744
BE-HLS 5050	701069076	04058863078298
BO-HLS 7050	701069083	04058863020082

Dear valued customer,

The HLS Set Advanced is intended for use in an extracorporeal circulation for cardiac support and/ or pulmonary support.

Maquet Cardiopulmonary GmbH (MCP) has received customer complaints of damage to the primary packaging of the HLS Set Advanced. In all customer complaints it was reported that the Tyvek cover was damaged. The appearance of the packaging failure can be hole(s) in the Tyvek. The damages are caused by the tabs of the venous probe holder within the packaging. Consequently, holes can appear on the left side of the Tyvek (pictures 1 and 2), which corresponds to the position of the venous probe holder.

Pictures 1 and 2 holes

Template: CP-SOP-001-T-02 V02, Effective date 2019-09-15

The results of the product packaging investigation suggest that the Tyvek damage only occurs, if the HLS Set drops with the topside facing down so that either the velcro straps, which hold the HLS Modules, come loose or the HLS Module detaches. A shift/ movement of the HLS Module affords the opportunity for the venous probe tab(s) to perforate the Tyvek cover and the sterile barrier system may be compromised.

Exposure to a non-sterile or potentially non-sterile medical device, or a delay in the procedure, may result in following immediate and/ or long-range health consequences:

- Inflammation,
- Infection,
- Sepsis,
- Ischemia

Maquet Cardiopulmonary GmbH has not received any reports of adverse events due to damage to the sterile barrier system of the HLS Set.

Maquet Cardiopulmonary GmbH is working with urgency on the packaging design change in order to reduce the shift/ movement of the HLS Module. However, it takes time to perform such change based on all regulatory requirements. Therefore, we can provide to you at this time only devices with the same packaging design as possible replacement. The only changes in devices with old packaging design will be a better controlled transport condition against drops with the topside facing down and that all HLS Sets will have additional affixed "Inspection Instruction" on the white box. The affixed "Inspection Instruction" on the white box will help you to have a better traceability of the current packaging design. As soon as we have finalized the new packaging design change and have produced first lots, we will inform you about the first lot number.

Please take care that you check all devices which you have in your stock **today and devices which you can receive soon, provided your national competent authority allows this,** based on the provided instructions, see option 2 in chapter "Action to be taken" below.

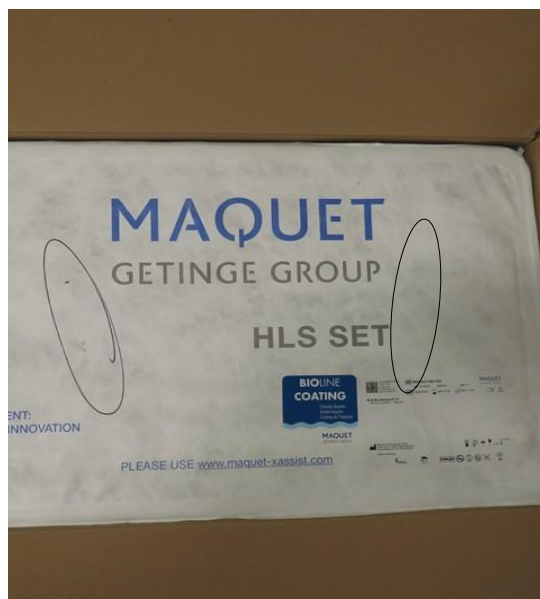

Action to be taken: Due to a potential delay of replacement products:

Option 1

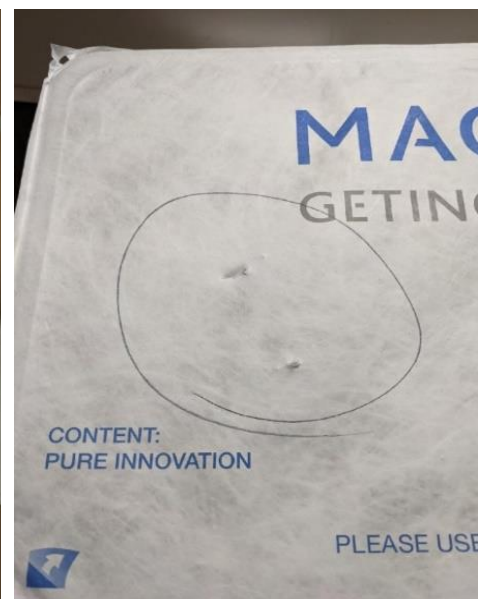

- Please return immediately all affected products in your stock to your local Getinge representative.
- In case of return of the affected products, please contact your local Getinge representative for credit or replacement.
- If a product is already in use, it should remain in use.

Option 2:

- If the products are necessary based on expert clinical judgement, you can use the devices after following these inspection measures:
 1. Prior to use, the HLS Sets Tray covers have to be checked visually for any damages, holes or tears in order to prevent the use of an unsterile medical device.
 2. After removing the tray from the secondary package (white cardboard box), position the tray in a well-lit area outside the sterile field.
 3. Check the integrity of the sterile barrier of the tray (Tyvek cover) before use. If any doubt arises as to package integrity, then it should not be used. Any product with damaged packaging must be returned to the local Getinge representative.

Picture 3: Most-likely position of potential damages

Picture 4: Typical appearance of damage

- **Please note**, that all products which you can receive at this time contains old packaging design and they have affixed “Inspection instruction” on the white box.

- Regardless of the decision you make, please complete and sign the attached customer response form and send it back to your local Getinge representative.
- Please report any adverse events in regards to the affected products to your Getinge Representative.

- Enclosed documents:**
- 656504 customer response form
 - Annex I List of affected batches

Transmission of the Field Safety Notice:

- This notice needs to be forwarded to all those who need to be aware within your organization or to any organization where the potentially affected devices may have been further distributed.
- Please maintain awareness of the notice and resulting actions for an appropriate period to ensure effectiveness of the corrective action.

We apologize for any inconvenience caused and assure you that we are working with highest priority on a solution. As required, we will provide this notification to the necessary Regulatory Agencies.

Should you have questions or require additional information, please contact your local Getinge representative.

Sincerely,

Managing Director
