

Doxylamine

Recommendations:

- **Amendments to the Product Information**

SmPC

Update of section 4.9 should be considered (underlined).

-Induction of emesis if short time after intake of tablets and provided that the patient is fully conscious

-Gastric lavage if short time after intake of tablets and provided that the patient is fully conscious

PL

Section 3 of PL should be updated in line with the proposal for the SmPC in a user friendly wording.
